

APG Senior Leadership Cohort Program 2010-2011 Information for the Community-based Project

Project Title
We are APG
Accountable Executive (Sponsor)
Dr. Laurel Allender
What is the Vision for the Project?
Develop a forum for networking and community building for APG workforce.
What mission will be achieved?
Create opportunity for APG workforce networking with organizational spotlights that focus on supporting our Warfighters. These meeting(s) will take place in an informal setting and could take the shape of brainstorming ideas, sharing capabilities, or organizing efforts to take advantage of APG resources (organizations, people, and infrastructure).
How it supports the APG Vision
This will help knock down the organizational boundaries between the numerous tenants on APG. It will organize efforts to familiarize, share limited resources, and collaborate within the APG community to improve organizational relations and awareness. Help APG tenants familiarize themselves with the broad infrastructure that now exists across APG such that they can leverage this capability for their own particular organization.
Measure of Success (what success looks like and how it is measured)
Active participation of attendants either through presentations or discussion. Continuing dialog between participants to share information between organizations. Solicit feedback from employees on usefulness of their shared experiences. Informal leveraging of information. Integrated working relationships. Situational awareness.
Scope Statement
Workforce representatives will meet to communicate ideas on the development of the APG community, network with the other APG tenants, and share common resources and capabilities information. Involvement will be voluntary; based on request for nominees from tenant organizations.
What is the Strategy for the Project?
Discuss vision with stakeholders to gather their feedback and support. With a starting list of APG tenants that is aligned with Cohort 3 participants, identify perhaps 3 to 5 initial points of contact for each tenant. Start dialog with initial POCs to determine historical data of the tenant, generate interest in participation, and identification of possible participants. Canvas nominated participants for ideas to focus the kickoff meeting. Hold kickoff meeting. Obtain feedback from the community. Follow up with emails/phone calls to possible participants. Hold follow-up meetings on a semi-regular schedule to continue previous work.

Major Achievements or Deliverables
Capture APG tenant descriptions and community interest. Develop list of POCs from each tenant. Hold monthly meetings with active participation. Identification of a few topics for future spotlight presentations. Plan tours of facilities, ranges, sites, offices and open for participants organizations. Commencement and execution of the plan/meeting. Demonstration of cross-organizational teamwork to build APG community.
Cohort Participant (Project Leader) Authority and Responsibilities:
Andrea Britton Nick Mastromanolis Jennifer Reed (Project Leader) John Runyeon Pamela Savage-Knepshield
Key Stakeholders needed to Succeed
Name of Person Senior leader from each organization we hope to participate. Initially, this list is based on Cohort 3 participant organizations.
Potential Leadership Growth Opportunities for the Cohort Participants
Network across APG organizations, break organizational internal tunnel vision, and show that there is a larger interconnected organization on APG. Develop and influence APG community vision. Lead the charge to unify APG community.
Cohort 1 Advisor Dr. Laurel Allender
Faculty Team Advisor Ms. Marcia Feola
